

src/mdlib/genborn_sse2_single.h

```
graph TD; A[src/mdlib/genborn_sse2_single.h] --> B[typedefs.h]; A --> C[grompp.h]
```

The diagram illustrates a header file dependency. A central box at the top contains the text 'src/mdlib/genborn_sse2_single.h'. Two blue arrows originate from the bottom edge of this box. The left arrow points to a box containing 'typedefs.h', and the right arrow points to a box containing 'grompp.h'. This visualizes that the top-level header file includes both 'typedefs.h' and 'grompp.h'.
