

include/thread_mpi/barrier.h

```
graph TD; A[include/thread_mpi/barrier.h] --> B[visibility.h]; A --> C[wait.h];
```

The diagram illustrates a header file dependency. A central box at the top contains the text 'include/thread_mpi/barrier.h'. Two blue arrows originate from the bottom of this box and point downwards to two separate boxes below it. The left box contains the text 'visibility.h' and the right box contains the text 'wait.h'. This represents the 'include/thread_mpi/barrier.h' file including the 'visibility.h' and 'wait.h' files.

visibility.h

wait.h
