

src/tools/eigensolver.h

```
graph TD; A[src/tools/eigensolver.h] --> B[types/simple.h]; A --> C[sparsematrix.h];
```

The diagram illustrates a header file dependency. At the top, a grey box contains the text 'src/tools/eigensolver.h'. Two blue arrows originate from the bottom of this box and point downwards to two separate white boxes. The left box contains the text 'types/simple.h' and the right box contains the text 'sparsematrix.h'. This visualizes that the 'eigensolver.h' file includes or depends on both 'simple.h' and 'sparsematrix.h'.

types/simple.h
